PROFILE

I love the process of conceptualising new web applications that make life easier for people. I enjoy the challenge of problem solving. I also enjoy the challenge of debugging and creating something from nothing. My biggest strengths lie in project management, building positive client relationships and the ability to instil positivity with any team I am placed into. As an Agile Web Developer, with knowledge on JAVA my career goal is to gain a role which allows me to further my knowledge and skills, granting me new opportunities and broadening my horizon. I have knowledge on how to create a prototype using Figma, adding data on GraphCMS. Creating an App using React just to name a few.

EDUCATION

National Certificate: 2013
Information Technology

Matriculated: Wynberg High
School: 2008

WORK EXPERIENCE CONT.

JOB POSITION

Open Learn| Johannesburg | 2018 - 2019

Designing Websites using HTML5, CSS and JavaScript. Also has the opportunity to learn Java and use GIT. Used GIT as a platform to collaborate projects.

Communicating effectively with team members. Time management as we had to complete the task by a certain period of time.

PROJECTS

2021 - Move Your Body -

Url : <https://moveyour-your-body.herokuapp.com>

Github Repository: <https://github.com/Plenis/move-your-body>

As a Team we were given a project to come up with an App that will be useful to users. We came up with this idea. Due to Lock down most people including myself started gaining weight and struggled to maintain it and with this App it will help users in maintaining their weight and exercises while at home.

2021 - Eazy Meals -

Url: <https://team-eazy-meals-two.netlify.app>

GitHub Repository : <https://github.com/TeamEazyMeals/eazy-meals>

As a team we came up with an idea of creating an app that will help users in creating meals that will cater for the whole family and has different preferences. And can filter by type, preference and days.
